

# EDUCATIONAL PROFILE

*Enhance your child's strengths and learning opportunities*

## WHAT IS AN EDUCATIONAL PROFILE?

An *Educational Profile* is a report produced from a range of educational, psychometric and other functional assessments. The information is evaluated and recommendations are made to support a child or young person to optimise their learning and experience at school.

## WHAT DOES AN EDUCATIONAL PROFILE OFFER?

- **Mini Profile:** The *Mini Profile* may suit students who do not require psychometric testing for specific purposes, such as special exam conditions. This includes detailed literacy, mathematics and information processing assessments. Recommendations will be made for educational programmes and other adaptations to assist your child in the school environment.
- **Maxi Profile:** The *Maxi Profile* can support the application for special exam conditions. The Wechsler Intelligence Scale for Children IV or The Woodcock Johnson III psychometric assessment incorporates literacy, maths and other functional testing to assess a student's cognitive strengths and difficulties.
- **Other Profiles:** Other assessments and profiles are possible on request. *Please email or phone to discuss your needs with us.*

## When is an Educational Profile useful?

- When applying for special exam conditions
- To enhance learning strengths and identify support needs
- When wanting to inform and support inclusion
